

# Kashif Ali

## Full-Stack Web Developer

A highly motivated and experienced Full-stack developer with 3 years of experience in web development using Javascript and TypeScript. I have a strong understanding of React.js, Next.js, Node.js, Express.js, Firebase, MySQL, and have worked on both MERN and PERN stacks. I am confident that my experience, skills, and passion for web development make me a valuable asset to your company. I am eager to join a dynamic and innovative team where I can continue to grow as a developer and make a meaningful contribution to your company's success

## PROJECTS

### Material-Kit Adim Dashboard (07/2021 - 10/2021)

- The Admin Dashboard is a user-friendly platform built with React and Material UI, designed for website administrators to manage the website's data and users.
- The dashboard features a User Page to manage user information, a Products Page to add, edit and delete products, a Blog Page to manage blog posts, a Login/Registration Form authentication with its easy-to-use interface
- Repo link : <https://github.com/jaxkashif34/Material-kit>

### Spotify-Clone App (03/2021 - 04/2021)

- A music streaming app built with React Native. The app features a Home Screen with personalized recommendations and playlists, a Search Screen for finding music and content, a Library Screen to access saved music, a Song Screen to control playback, and more options screens to customize the experience.
- Repo Link : <https://github.com/jaxkashif34/spotify-clone>

### Dev.io Clone (01/2023 - Present)

- The Admin Dashboard is a comprehensive platform built with React, Ant Design, and Redux, designed to help website administrators manage the website's data and operations.
- The dashboard features a Dashboard Page with key metrics and performance, a Table Page to view and manage data, a Billing Page to handle financial transactions, an RTL Page to support right-to-left languages, and a Login & Registration Form for secure authentication.
